**“WE WILL STRIVE TO BE OUR CLIENTS’ FIRST
CHOICE THROUGH PLANNING, ENGINEERING AND
MANAGEMENT EXCELLENCE.”**

TRANSPORTATION SERVICES OVERVIEW:

A recognized leader in highways and streets design services for over 50 years, Urban Engineers (Urban) attributes its excellent reputation to the ability to provide clients with the highest level of professional competence, quality, and commitment.

Whether rehabilitating local roadways, designing major expressways, or improving the flow of traffic through urban environments, our experts take pride in delivering responsive, innovative, and sustainable transportation solutions that connect communities, enhance mobility, and increase the safety of our highways and streets. We understand the challenges faced by our clients in managing transportation investment decisions, supporting system preservation, and maintaining quality of service. We work diligently to exceed expectations.

Urban is ready to mobilize its team of highway and street engineers, leaders in their respective fields of planning, design, and construction services, to assist you in completing
